

The Smart Solution for Industrial Machines and System Integration

Automation for a Changing World

Delta Hot Swappable Mid-range PLC AH Series

www.deltaww.com

AH - Automation System for High-level Applications

The new generation AH Series PLC provides automation solutions for high-level applications. The combination of modularized hardware structure, advanced functions, and the highly integrated software provides a system solution for process control applications. In addition to various function blocks, excellent performance, and an abundant selection of extension modules, the AH Series PLC also provides exceptional system expandability and full redundant solution, greatly reducing the system cost for a broad range of applications.

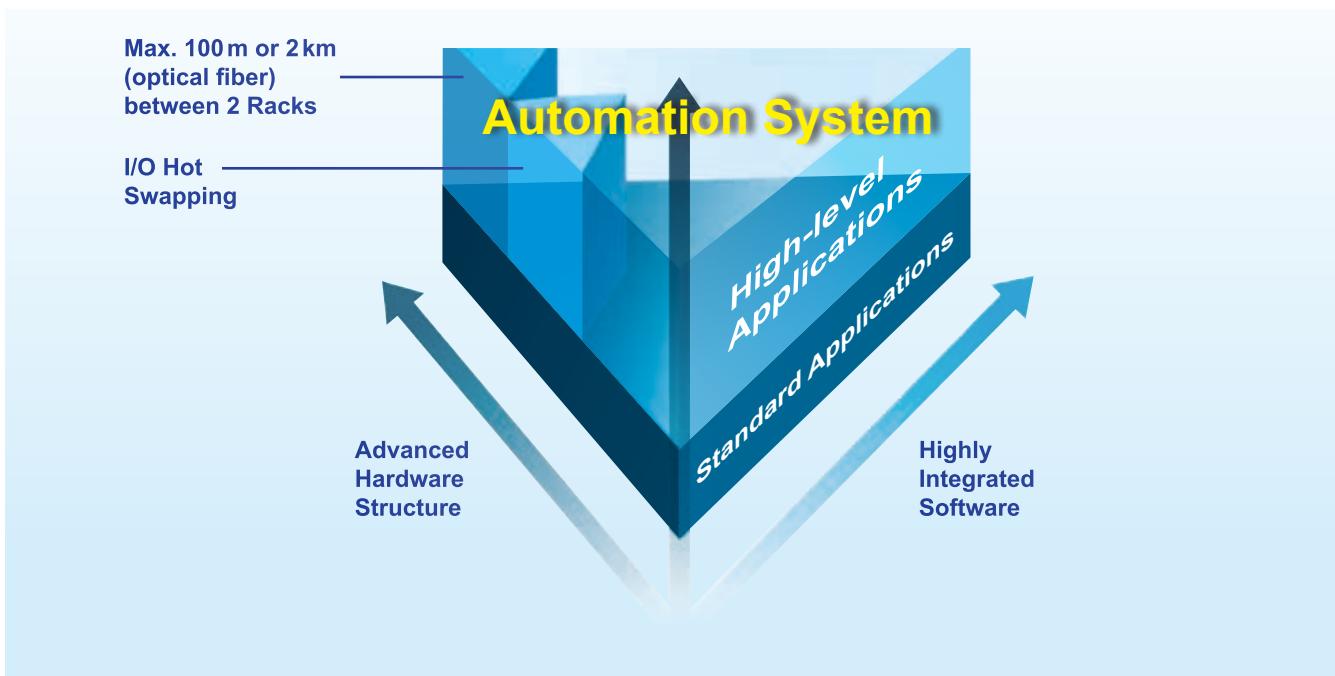

AH Series

» **Highly integrated software ISPSoft:**
graphical interface with 5 programming languages
» **Enhanced flexibility:** Max. 100m or 2km
(optical fiber) between 2 local extension racks
» **Redundant and hot-swapping functions keep**
the system running for improved maintainability
» **Reliable operations of the supported modules in**
severe conditions
< Operating condition: -20~60°C / 5~95% (Non-condensing)
< Storage condition: -40~70°C / 5~95% (Non-condensing)

- Utilizes 32-bit processor
- Max. I/O points:
DIO: Max. 4,352 points
AIO: Max. 544 channels
RIO: >100,000 points
- Program capacity: Max. 1M steps (4MB)
Data register (D+L): 512k words
- Excellent program execution speed:
LD instruction execution speed: 0.02µs
- CPU built-in with fully isolated
RS-232/422/485, Mini-USB, Ethernet and
SDHC card slot
- Abundant selection of DIO modules,
AIO modules, temperature measurement
modules, network modules, pulse-train
modules and DMCNET/EtherCAT motion
control modules

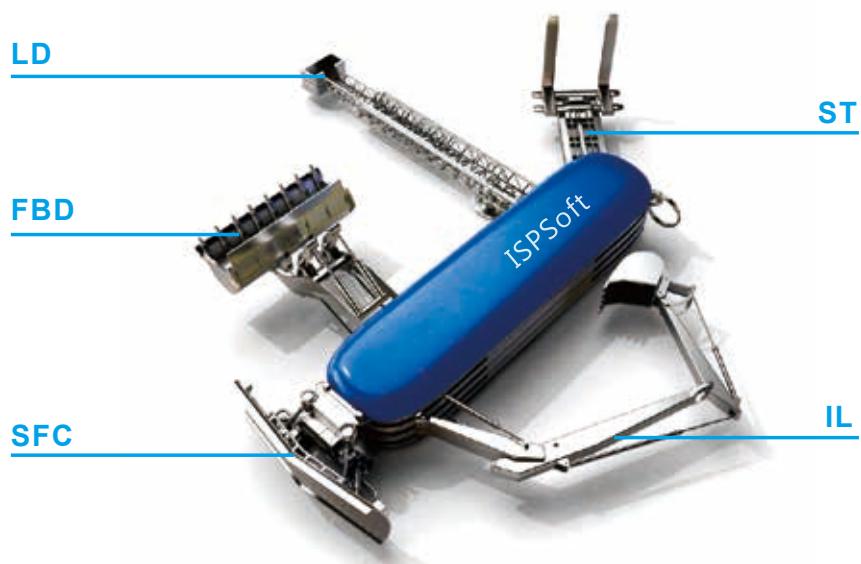

AH Series PLC – Automation System with Fully Integrated Hardware and Software Interfaces

Highly Integrated Software – Excellent Accessibility

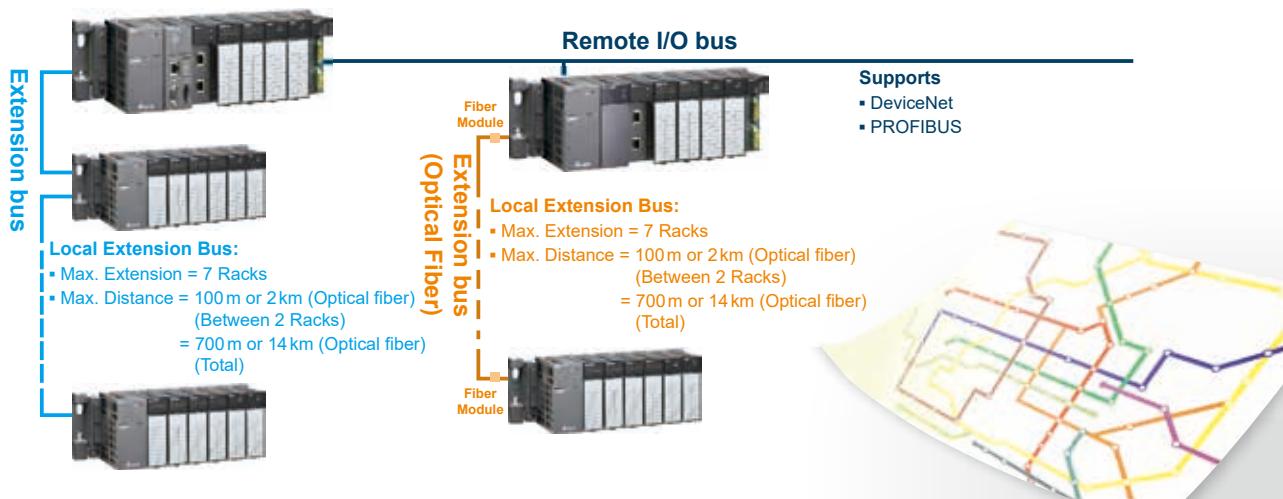

AH PLCs adopt the highly accessible programming software ISPSoft, integrating the main functions that include control process programming, hardware configuration, network configuration, and providing a graphical interface for these functions. In addition, users of ISPSoft can choose their most efficient programming tools from the 5 supported languages: Ladder Diagram (LD), Function Block Diagram (FBD), Sequential Function Chart (SFC), Instruction List (IL) and Structured Text (ST).

Enhanced Flexibility – Extends the System Freely

The length of extension cables between each AH local extension rack can reach a maximum of 100m or 2km (optical fiber), greatly enhancing wiring flexibility. In addition, the AH provides modularized backplanes and modules applicable for not only CPU racks but also for remote I/O racks. This feature improves the flexibility of system planning and reduces the additional cost that might be generated by preparing two different types of spare backplanes and modules.

System Extension Structure

Improved Maintainability – Keeps the System Running

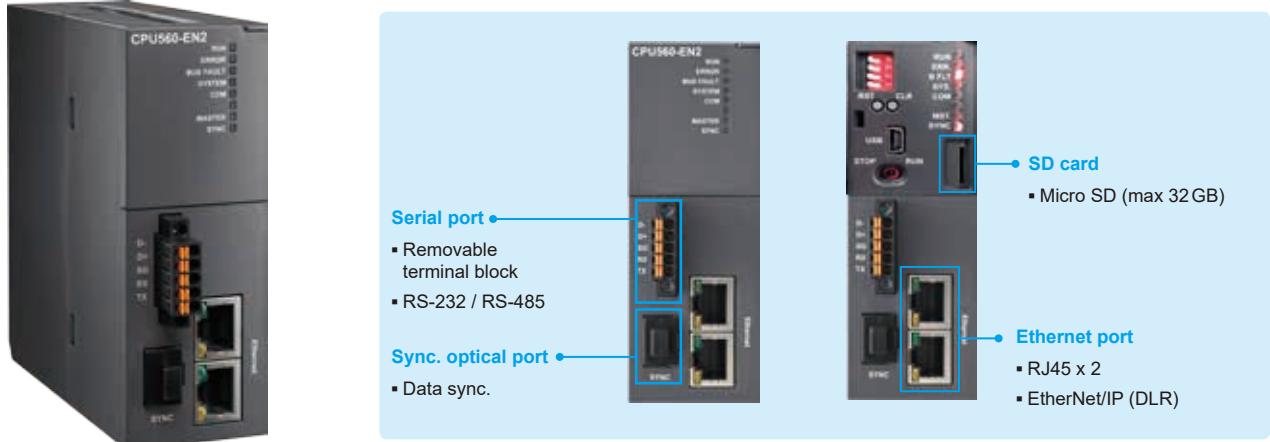

The hot-swap function provided for AIO and DIO modules increases maintainability when I/O modules fail. Users can replace modules without stopping the operation of the CPU module, preventing a possible loss due to a pause in the system's operation.

Redundant CPU

The redundant CPU of the AH Series adopts a reliable redundancy structure, and integrates synchronous modules, Ethernet ports and serial communication interfaces for a more competitive control solution.

AHCPU560-EN2

Redundant Backplane

The redundant backplane of the AH Series provides redundant power supply and communication interfaces for a complete control solution.

Redundant main backplane: AHBP04MR1-5A (4-slot)

Redundant expansion backplane: AHBP06ER1-5A (6-slot), AHBP08ER1-5A (8-slot)

Redundant System

Full Redundancy Structure

Redundant CPU	Redundant main backplane	Redundant power	Redundant ext. ports	Ring topology
---------------	--------------------------	-----------------	----------------------	---------------

Modules

Main backplane	Expansion backplane	RTU rack
▪ Ethernet module - AH10EN-5A (V3)	▪ DIO	▪ DIO
▪ Serial module - AH10SCM-5A (V3)	▪ AIO (includes temperature modules) ▪ Serial modules - AH10SCM-5A, AH15SCM-5A	▪ AIO (include temperature modules)

Tasks

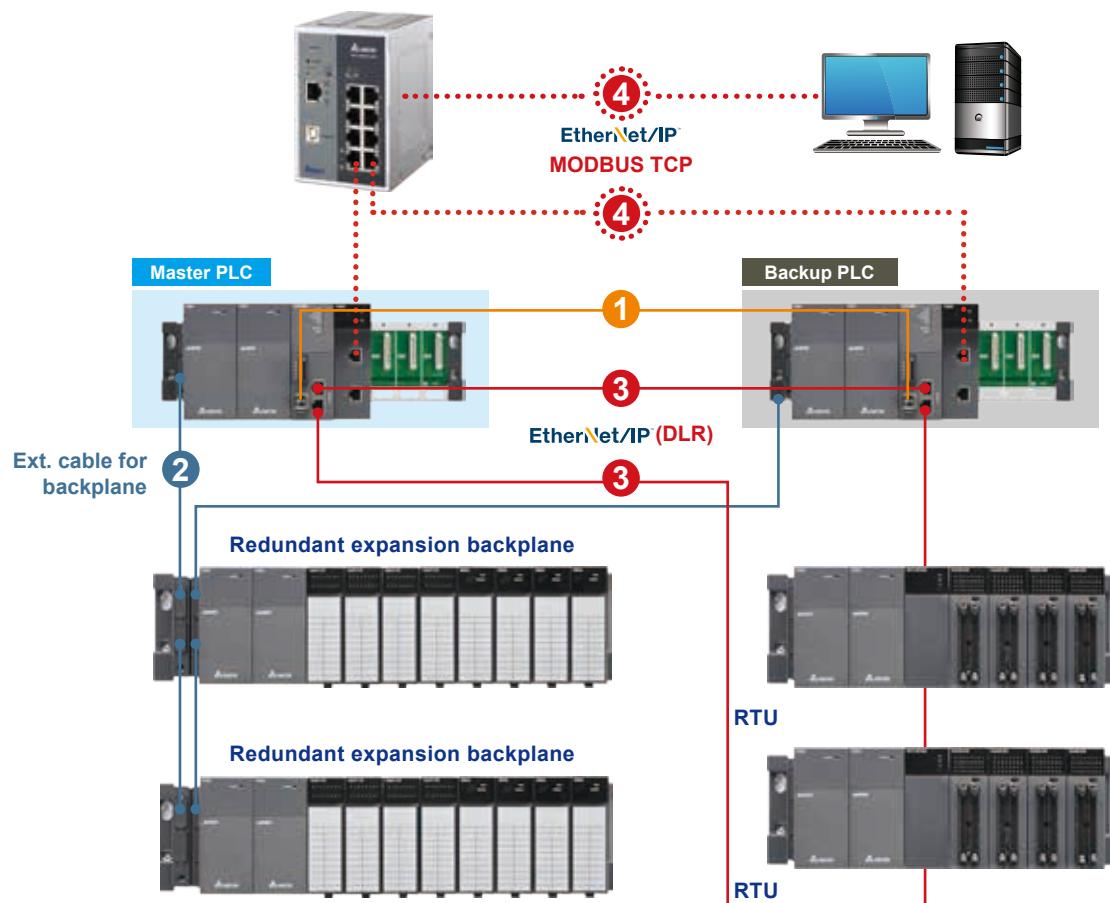

Cyclic	Timer interrupt
--------	-----------------

CPU built-in sync. module

CPU switch-over time: 20 ms

RTU nodes to support expansion backplanes

Standard backplanes available (under some conditions)

1 Sync. optical fiber

3 EtherNet/IP ring topology (DLR)

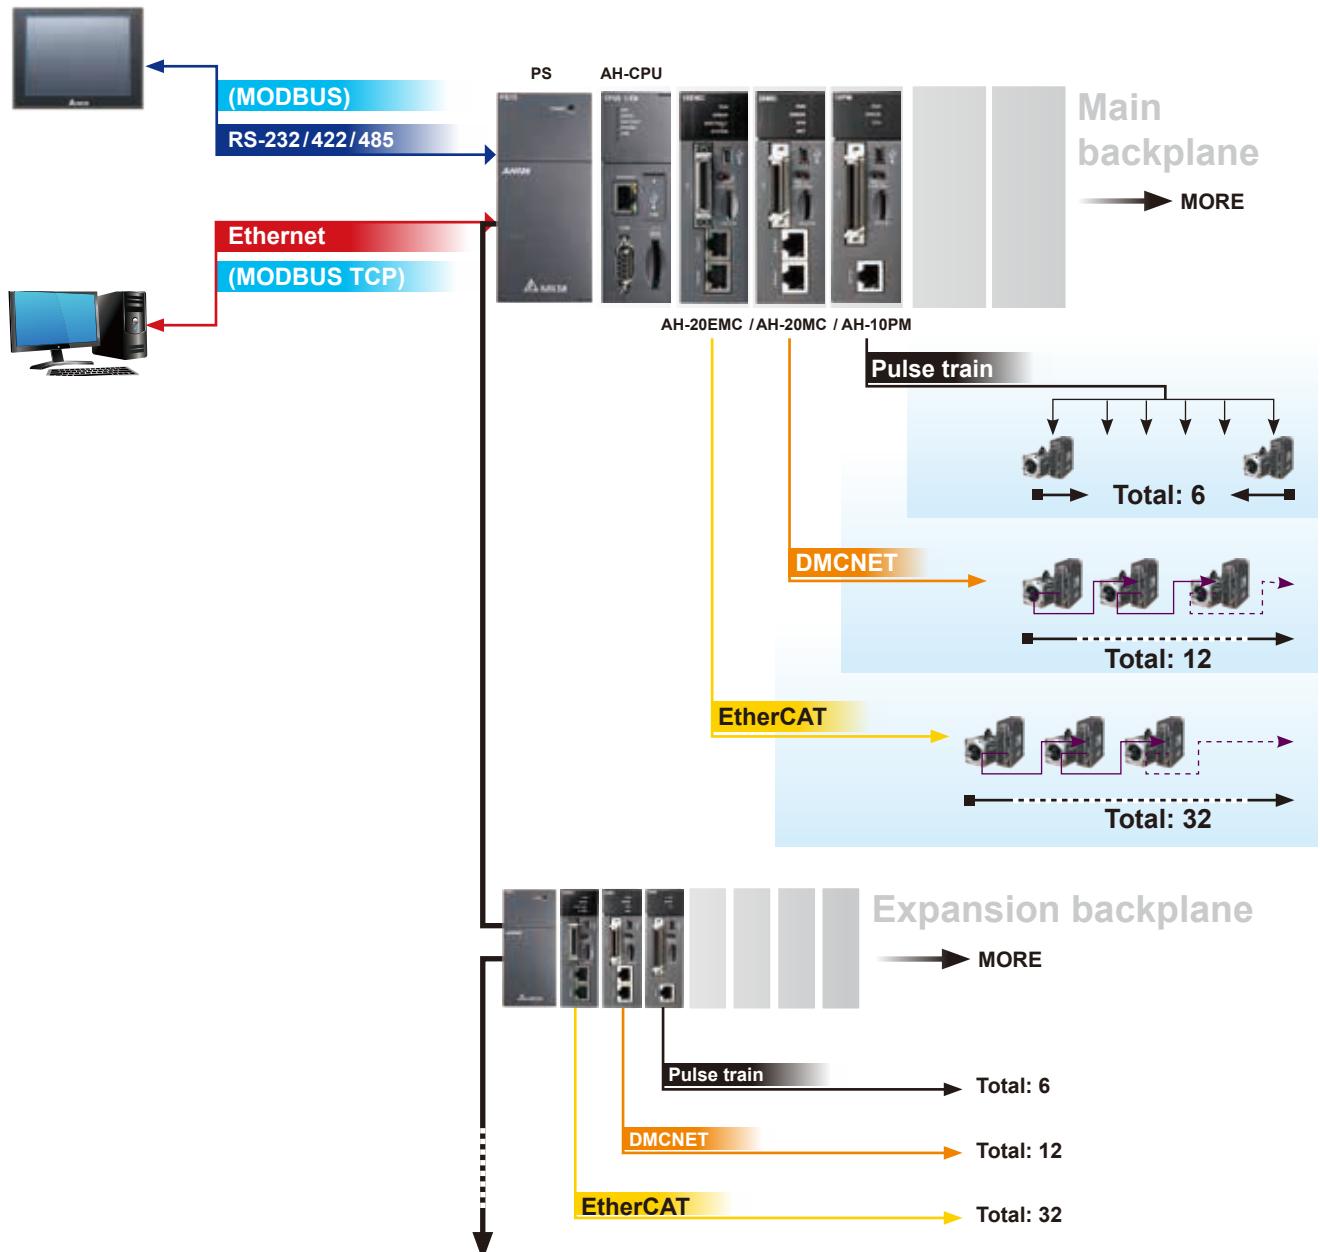

2 Ext. cable for backplane

4 Star topology EtherNet/IP, MODBUS TCP

Standard Motion Control System

- ▶ Provides EtherCAT, DMCNET and pulse train solutions for customers.
- ▶ Motion modules can independently take care of both the logic and motion control. Users can write and download the programs to the motion modules.
- ▶ All motion modules support the standard motion control system.
- ▶ All motion modules can be installed on the local backplanes.
- ▶ Motion control functions:
 - » Performance:
 - Pulse train module: Max. 1 MHz output
 - DMCNET module: Min. synchronization time at 12 axes is 1 ms
 - EtherCAT module: Min. synchronization time at 8/16/32 axes is 0.5/1/2 ms
 - » Supports UD/PD/AB/4AB input modes
 - » Supports MPD inputs/E-Cam/G-code/2~6 axes linear interpolation/2 axes arc interpolation/3 axes helical interpolation

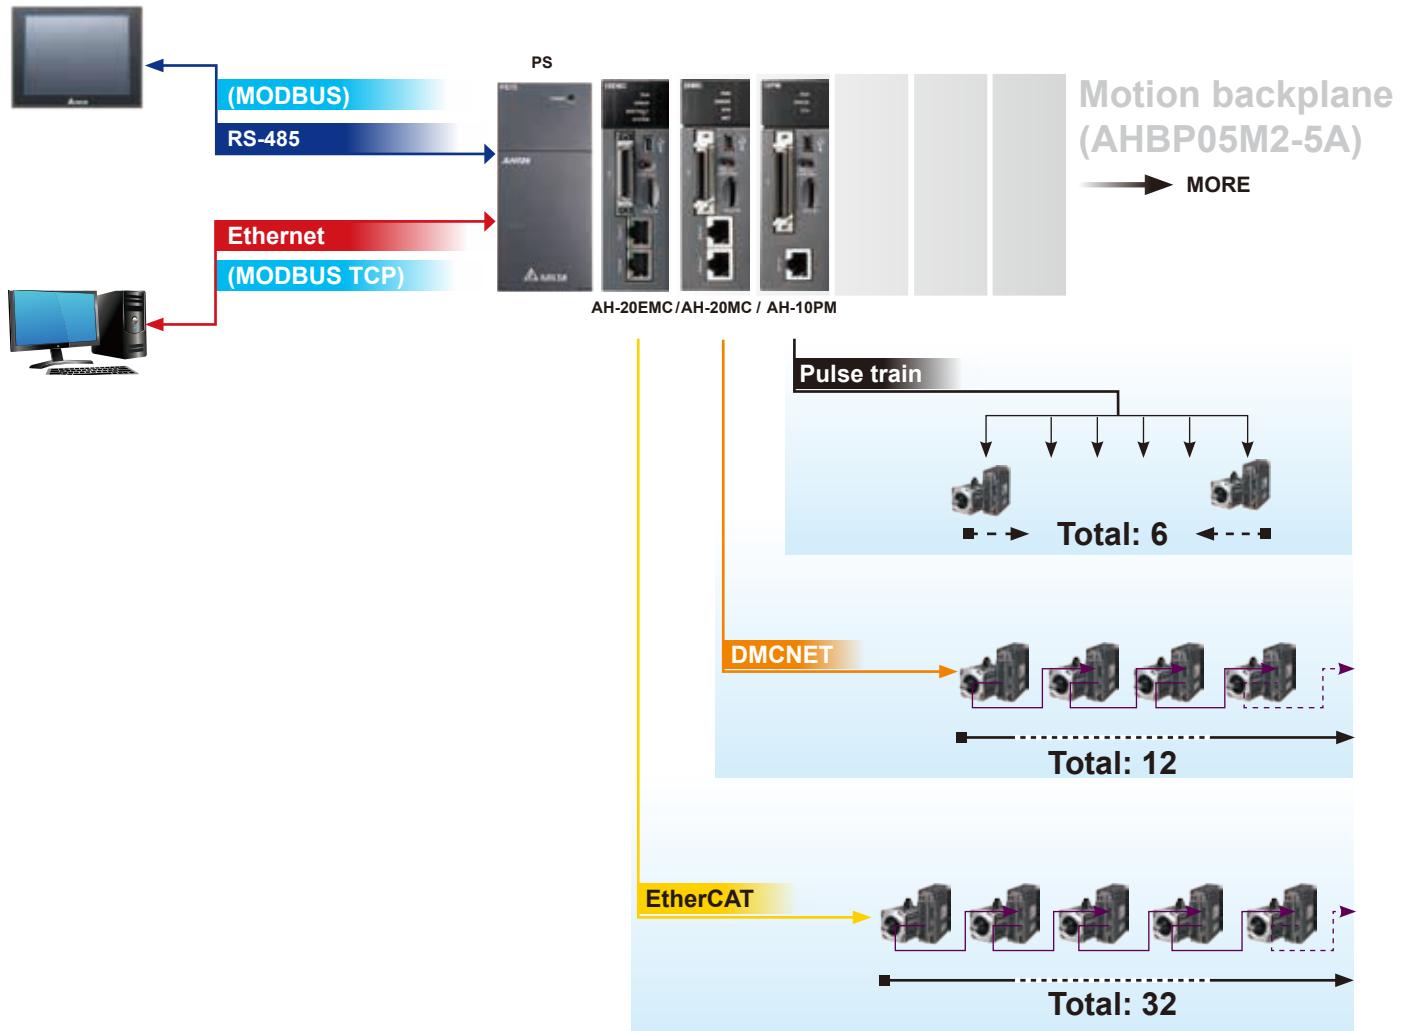

Note: The EtherCAT motion modules (AHxxEMC-5A) do not yet have support installed on the I/O slots.

Compact Motion Control System

- ▶ Provides EtherCAT, DMCNET and pulse train solutions for customers.
- ▶ AHxxEMC-5A motion controller can be installed on the CPU slot of the specific motion backplane and works as a CPU module.
- ▶ Compact motion control system does not support the expansion backplane.
- ▶ Motion modules can be installed on the I/O slot of the motion backplane.
- ▶ Motion control functions:
 - » Performance:
 - Pulse train module: Max. 1 MHz output
 - DMCNET module: Min. synchronization time at 12 axes is 1 ms
 - EtherCAT module: Min. synchronization time at 8/16/32 axes is 0.5/1/2 ms
 - » Supports UD/PD/AB/4AB input modes
 - » Supports MPD inputs/E-Cam/G-code/2~6 axes linear interpolation/2 axes arc interpolation/3 axes helical interpolation

Note: The EtherCAT motion modules (AHxxEMC-5A) do not yet have support installed on the I/O slots.

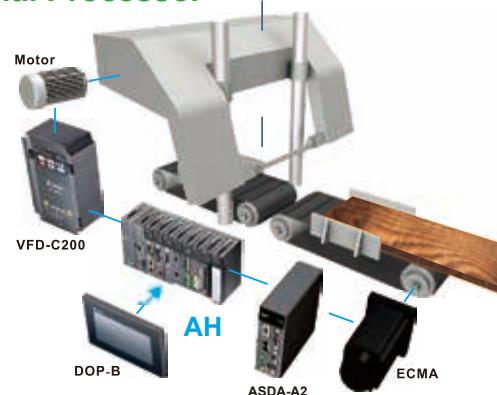

Application Examples

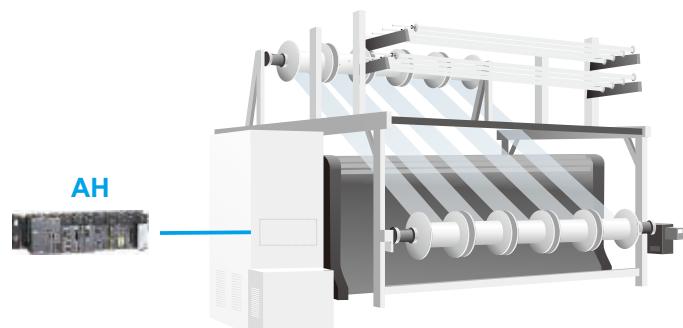

Large Scale Industrial Machines

The features of the AH can easily fulfill the system requirements of large scale industrial machines. By utilizing its unique local extension capability with versatile combinations of I/O modules, the AH can simplify the complex remote I/O system structure in large scale industrial machines with a local I/O system consisting of a single CPU rack and local extension racks, maintaining a high execution speed and lowering the wiring cost.

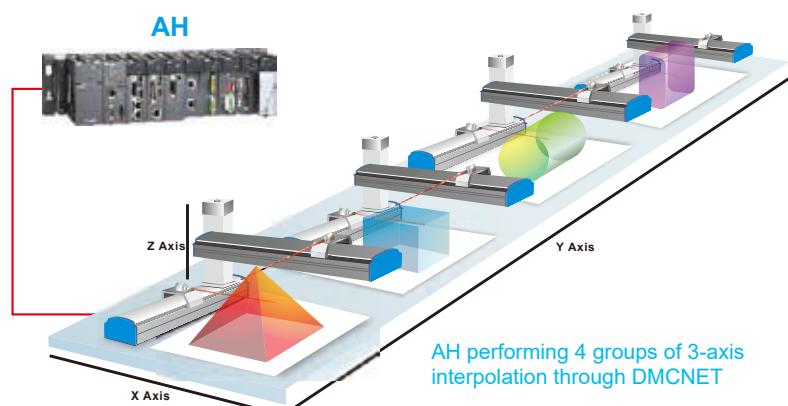

Building Material Processor

Warp Knitting Machine

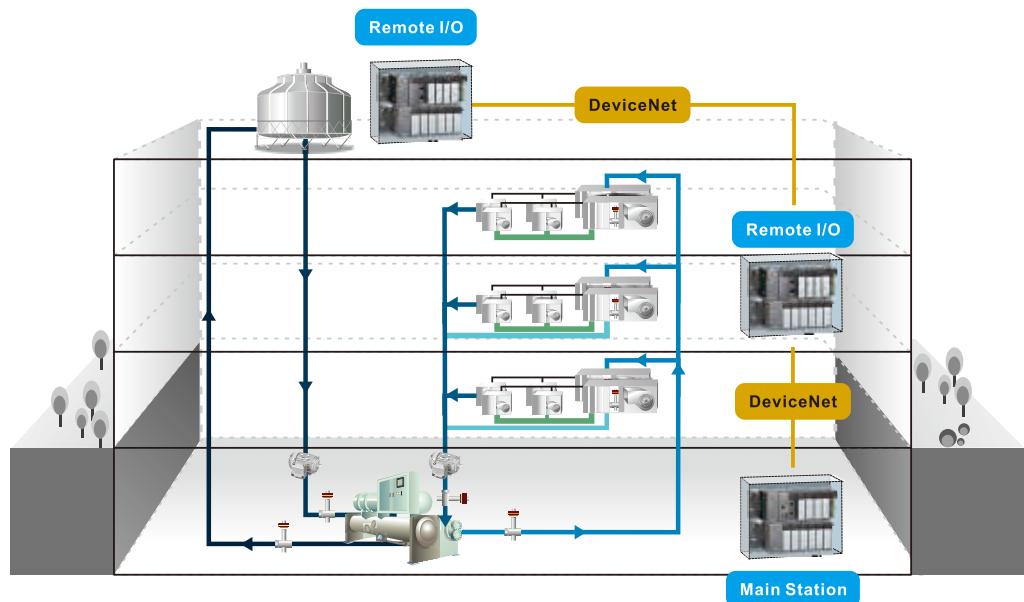

The AH also supports excellent motion control functions including 3-axis linear interpolation, 2-axis arc interpolation, and 3-axis helical interpolation. In addition, the AH is capable of controlling up to 12 axes or 4 groups of 3-axis interpolation synchronously through Delta's high speed motion control network DMCNET.

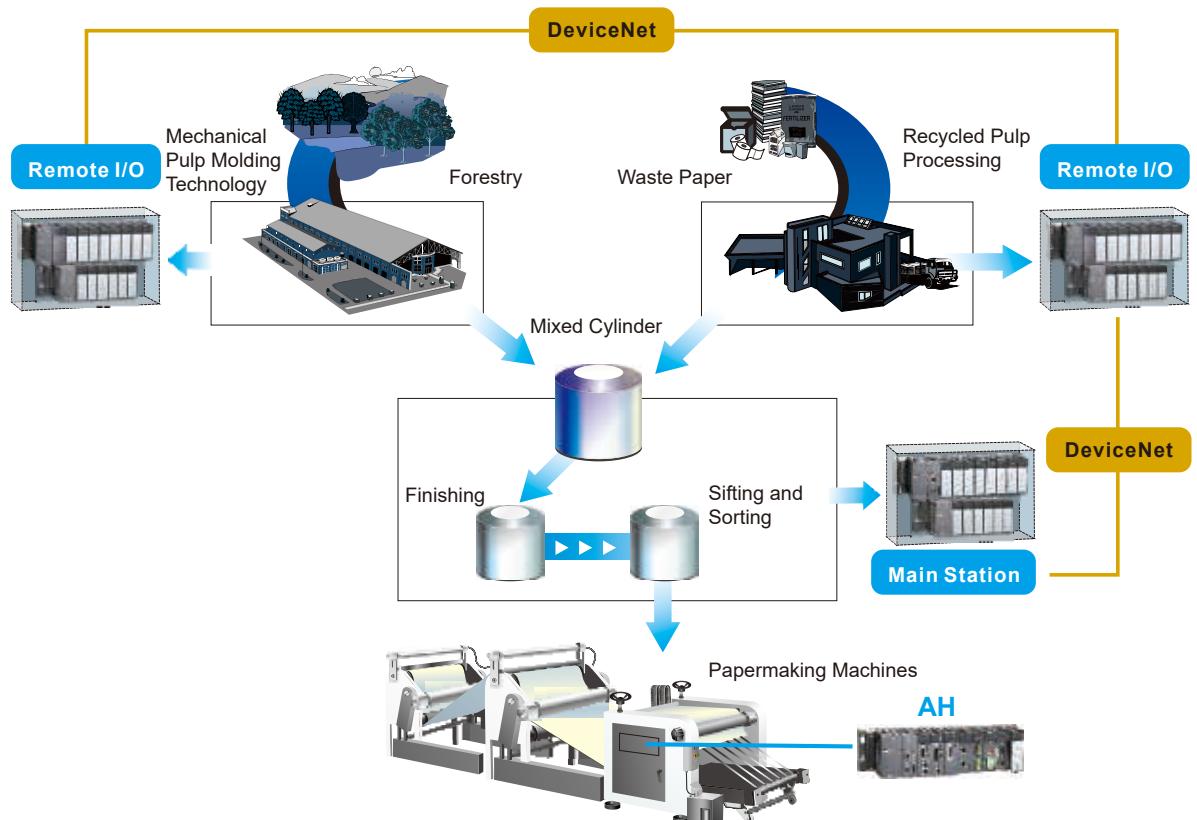

System Applications

The AH is a modular system controller designed for almost all kinds of high-level automation tasks. The abundant selection of I/O modules and the flexible system structure provide the best solutions for all types of system integration requirements. Through the remote I/O expandability, you can build up the AH main station as a central control system and allocate the remote I/O systems on different floors for HVAC applications, or in different processing stations for the paper-making industry. The AH can not only fulfill the application requirements of industrial machines or devices, but it can also provide total solutions for automation systems.

HVAC

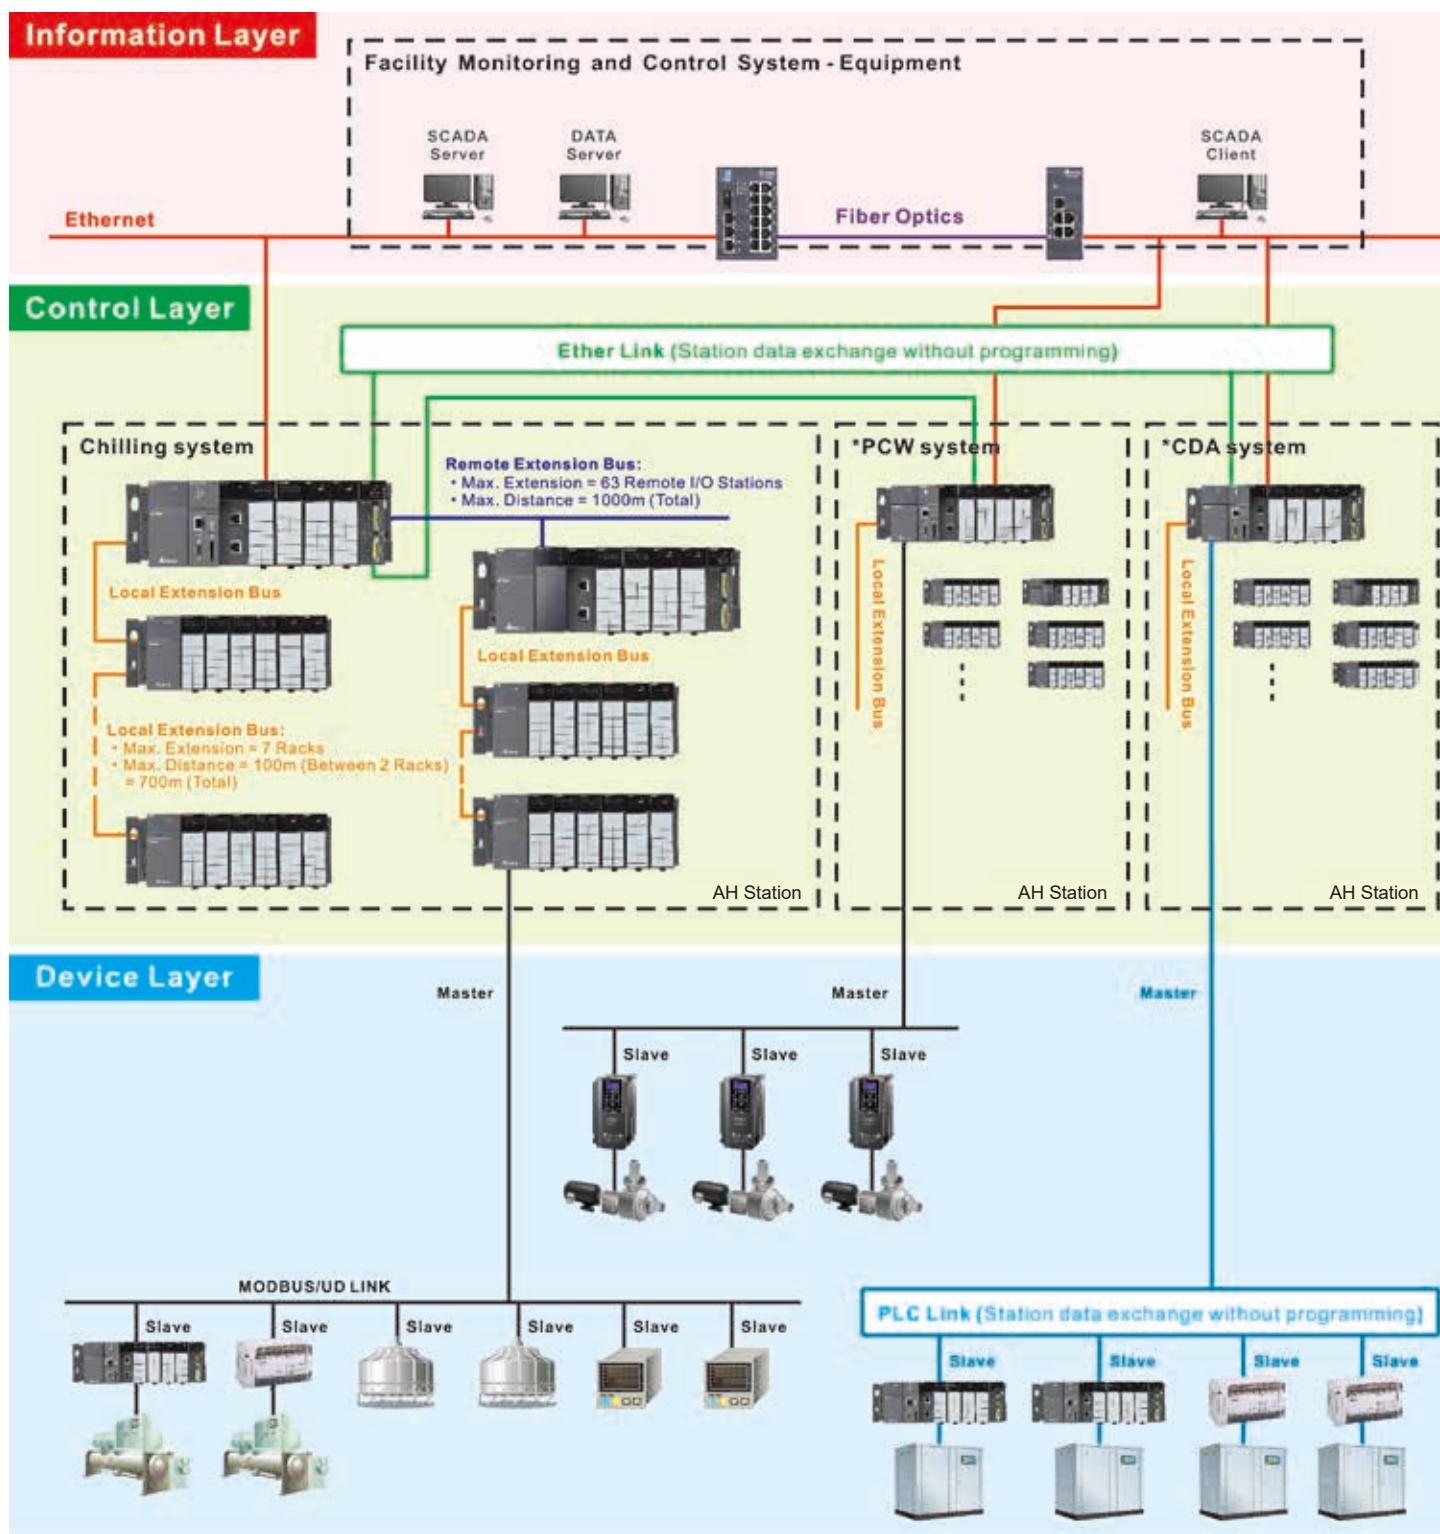

Papermaking Industries

AH System Structure – Facility Monitoring and Control System

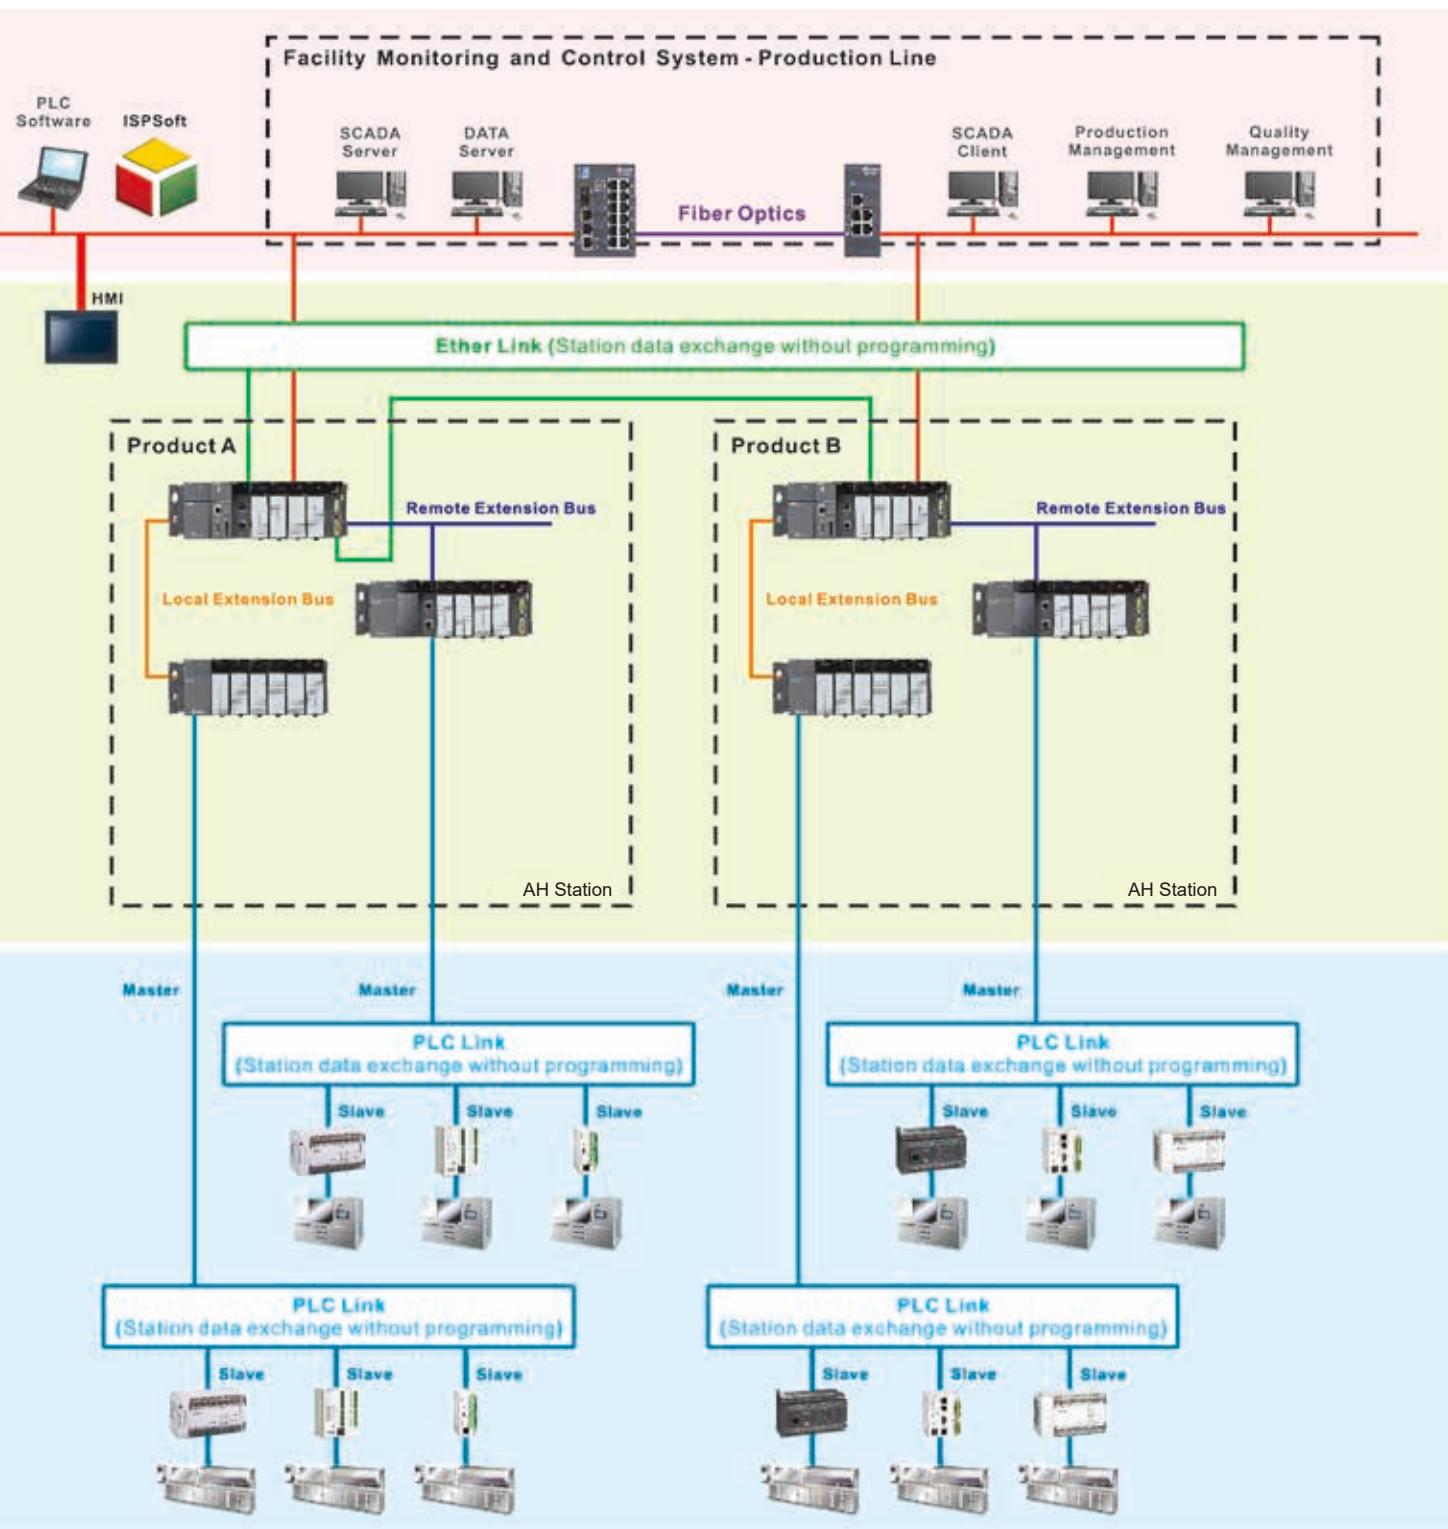

The system configuration of the AH is well demonstrated by the Facility Monitoring and Control System (FMCS).

The AH in the control layer connects multiple facility systems and product processing systems and performs data exchange without programming through Delta's convenient PLC Link and Ether Link. PLC Link can be applied for data exchange between masters and slaves, and Ether Link can be applied for data exchange between AH master stations. The smart communication feature can save you time spent in programming.

* [Note] PCW system: Process Cooling Water System ; CDA system: Clean Dry Air System

In addition to AH PLCs, Delta's industrial automation solution includes human machine interfaces (HMI), DVS series industrial Ethernet switches, DVP series PLCs, AC motor drives, AC servo drives and temperature controllers. You can find the best solution for your industry from our product lines across the device layer, control layer and information layer.

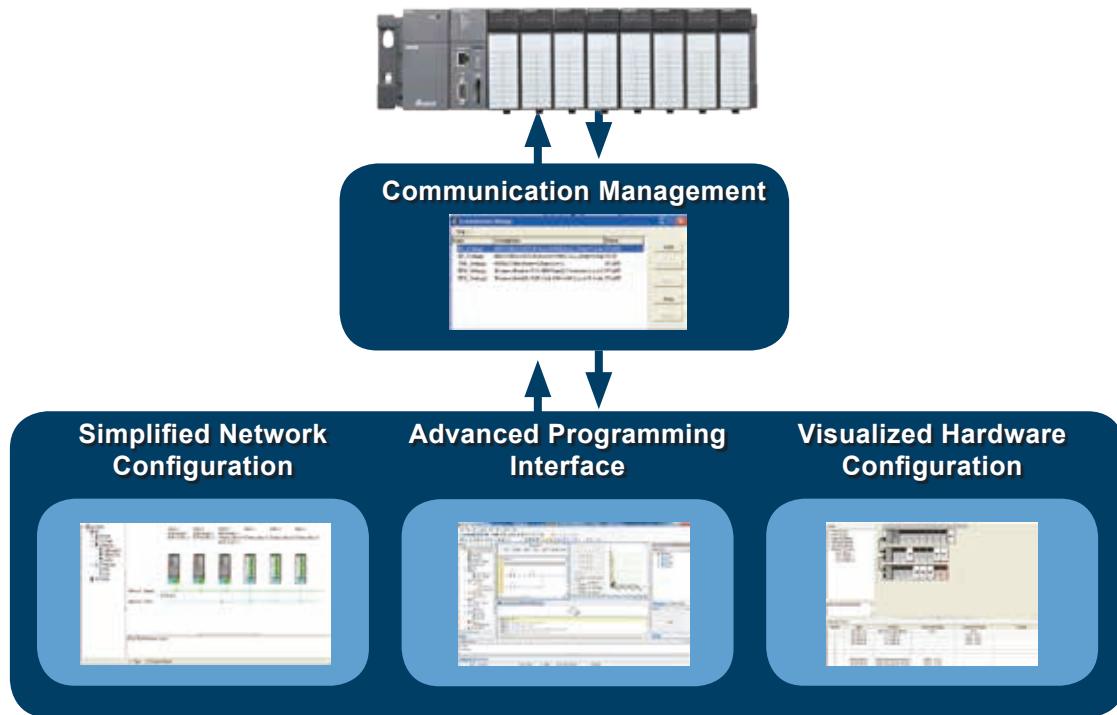

ISPSofT V3.0

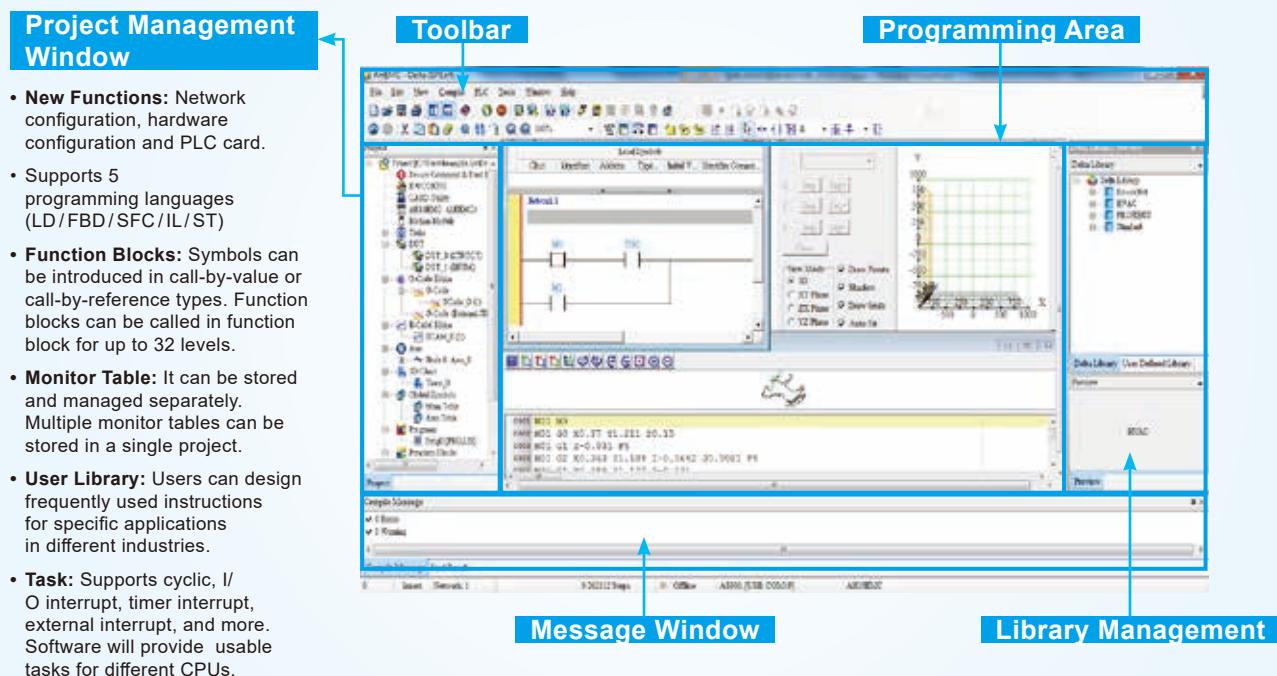

Highly Accessible Programming Software

Fully Integrated Interface

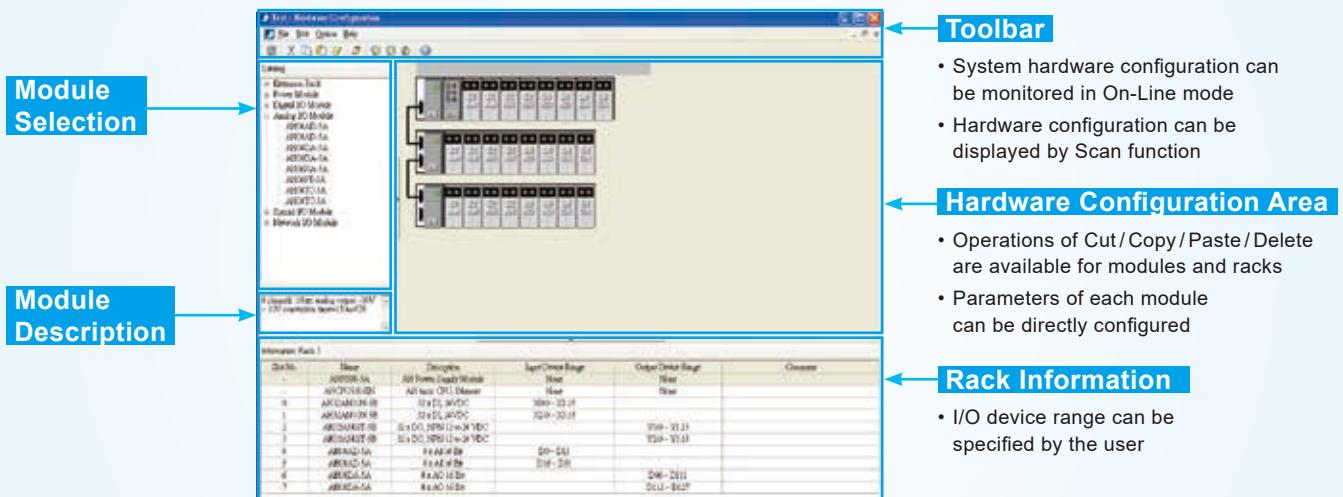

Advanced Programming Interface + Visualized Hardware Configuration + Simplified Network Configuration + Data Tracer & Logger + Motion programming

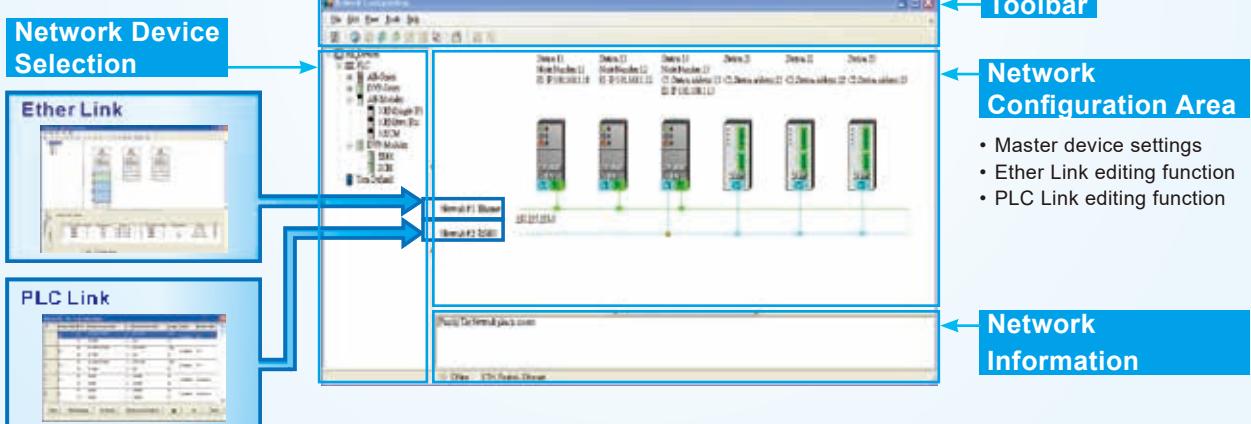

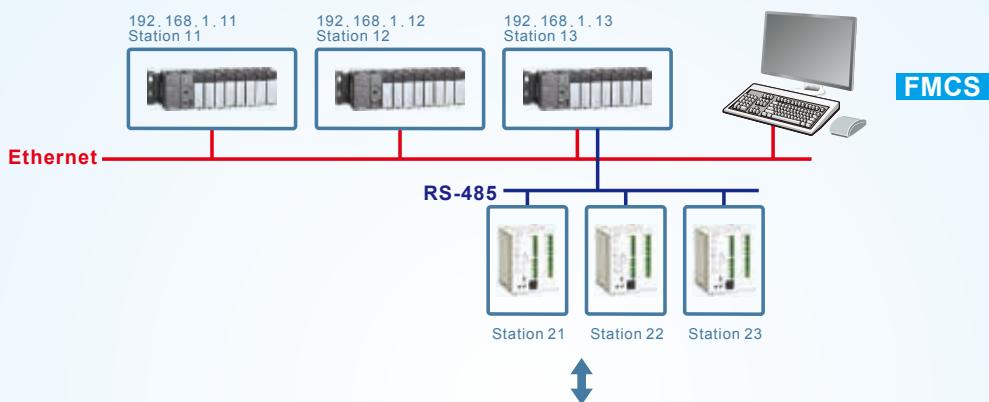

Advanced Programming Interface

Visualized Hardware Configuration

Simplified Network Configuration

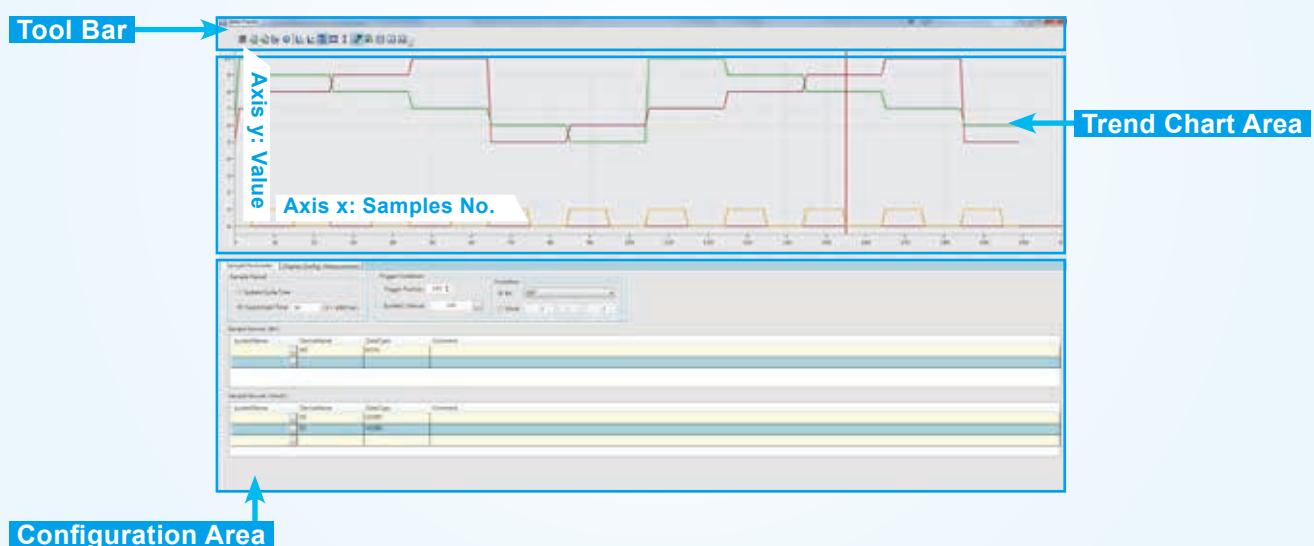

Data Tracer & Logger

Data Tracer

Provides high speed data log ability and the interval could be 1 CPU scan. Users can easily analyze the program logic with this function.

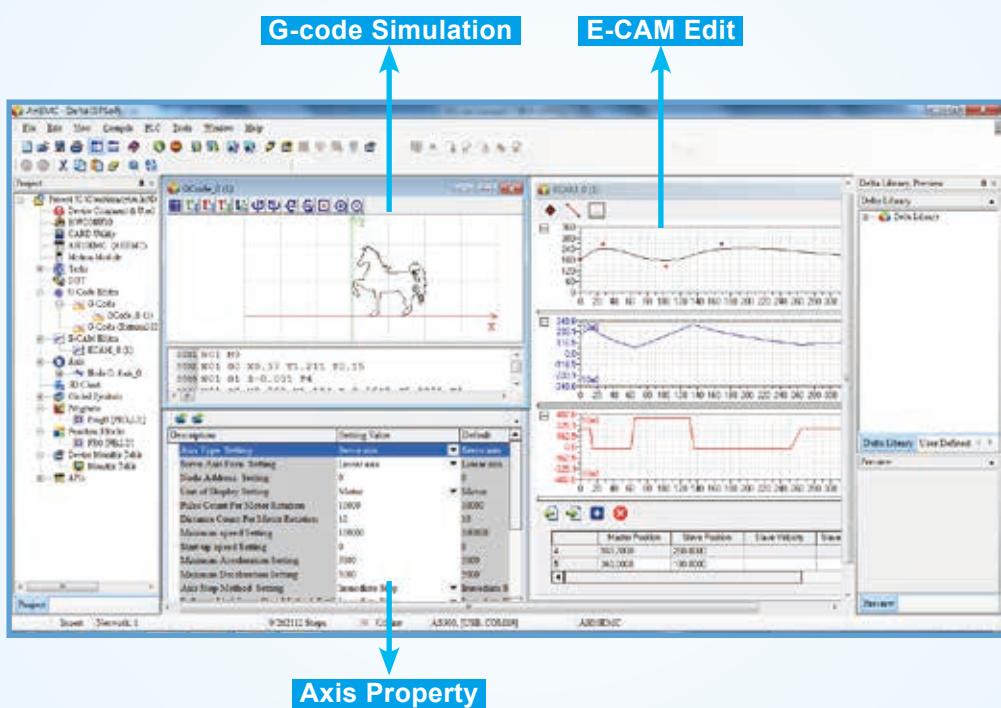

Data Logger

Provides big data log ability and adjustable intervals. Users can log critical system data and then analyze the system operation status.

Integrated Motion Programming

ISPSof V3 integrates the logic and motion program editors into one software

PMSoft V2.0

This programming software is for G-code editing, motion trajectory simulation, positioning route instruction and electronic cam establishment.

The diagram illustrates the features of PMSoft V2.0, each linked to a specific function or tool within the software:

- Variable Declaration**: Separates variable declarations from the program. The corresponding physical I/O point of the variable is defined only after the program is compiled. Users do not need to modify the program.
- Function Block**: A complicated project can be divided into many function blocks. A function block can be used repeatedly. The import/export function makes the programming more convenient.
- Function Block for Motion Control**: Provides function block features specifically for motion control, making programming more convenient.
- Convenient Monitor Table Management**: Users can save and manage monitor tables independently according to their needs.
- Electronic Cam**: Electronic cam editing.
- CFC Editor**: Supports CFC programming language.

Screenshots of the software interface include:

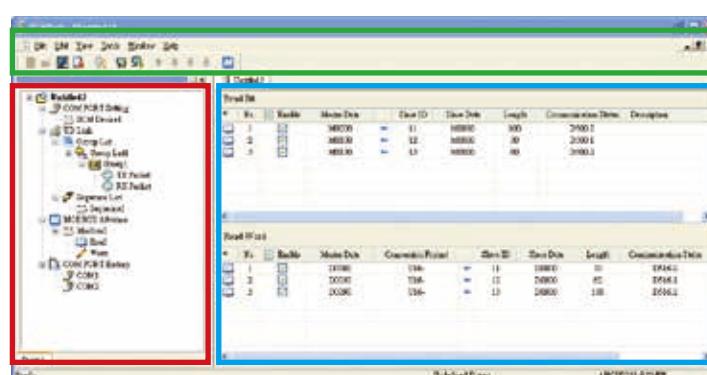

- A screenshot of the "Variable Declaration" table showing local symbols like VAR, Address, Type, and Comment.
- A screenshot of the "Function Block" logic block diagram showing various blocks and their connections.
- A screenshot of the "Function Block for Motion Control" table showing monitor tables with columns for Description, Name, Value, and Status.
- A screenshot of the "Convenient Monitor Table Management" table showing a list of monitor tables with columns for Description, Name, Value, and Status.
- A screenshot of the "Electronic Cam" window showing two waveforms and a table of parameters.
- A screenshot of the "CFC Editor" window showing a table of parameters.

SCMSof V1.0 Communication Editing Software

Provides SCM module with automatic data exchange setup function

Project Management Interface

- Supports user defined protocol (UD Link)
- Supports MODBUS protocol
- Supports data monitoring for communication ports

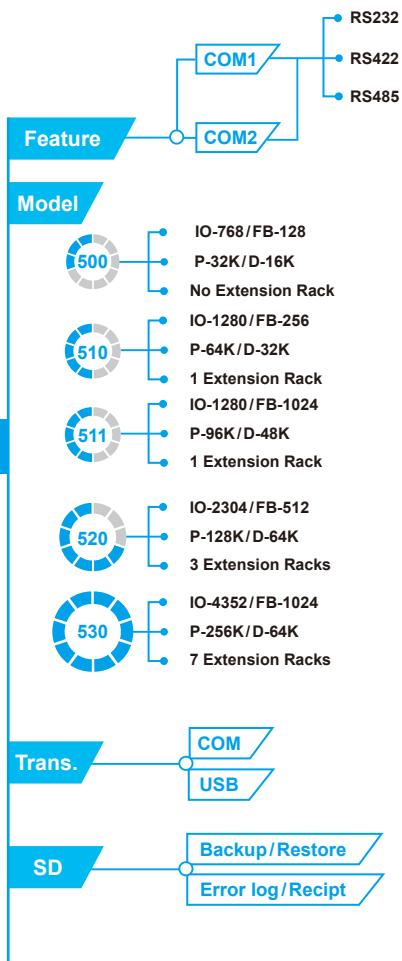

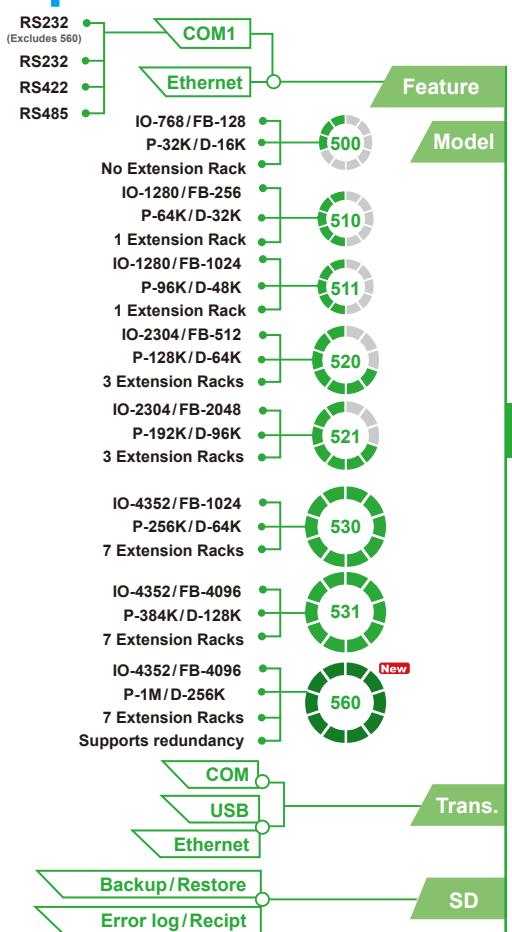

Toolbar

- Upload / Download setup files
- Supports wizards

Editing Area

- Data exchange setup
- Status display

COMMGR [V1]	-	Free	Communication management software	AH series , DVP series PLCs
PMSof [V2]	-	Free	Motion control programming software	AH series , DVP series motion controllers
DCISof [V1]	-	Free	Ethernet configuration software	AH series Ethernet/serial communication modules, DVP series built-in Ethernet PLCs, DVP series Ethernet/serial communication modules, IFD series Ethernet modules, CMC series Ethernet cards for Delta motor drives
DeviceNet Builder [V2]	-	Free	DeviceNet configuration software	AH series DeviceNet modules, DVP series DeviceNet modules, CMC series DeviceNet cards for Delta motor drives
CANopen Builder [V2]	-	Free	CANopen configuration software	AH series CANopen modules, DVP series built-in CANopen PLCs, DVP series CANopen modules, DVP10MC motion controller
SYCON.net [V1]	-	Free	PROFIBUS DP configuration software	AH series PROFIBUS DP modules
Delta OPC [V1]	HASP-20-OPC01	Hardware license (USB)	Delta OPC server	AH series PLCs
ECAT Builder [V1]	-	Free	EtherCAT configuration software	AH series , DVP series PLCs
EIP Builder [V1]	-	Free	EtherNet/IP configuration software	AH series , DVP series PLCs

Ethernet Connection Information

Connection type	AHCPU500/510/520/530-EN	AHCPU511/521/531-EN AHCPU560-EN2 <small>New</small>	AH08/10/20EMC-5A	AH10EN-5A	AHRTU-ETHN-5A
MODBUS (Server)	32	32	32	128	---
MODBUS (Client)	16/32/64/128	32/64/128	128	64	---
EtherNet/IP (TCP)	-	32/64/128	16	64	48
EtherNet/IP (CIP)	-	64/128/256	32	64	96

Motion Control Modules

Model	Channels /Axes	Terminal block type	Power consumption (Internal)	Accessories (optional)	Specifications	Certificates
AH02HC-5A	2	EU removable terminal block	2.4w	-	<ul style="list-style-type: none"> ▪ High speed counter 	 
AH04HC-5A	4	HDC	2.4w	UC-ET010-13B UB-10-IO16C	<ul style="list-style-type: none"> ▪ High speed counter 	
AH05PM-5A	2	EU removable terminal block	2.7w	-	<ul style="list-style-type: none"> ▪ Pulse train motion control module ▪ Supports 1MHz output ▪ Supports 2-axis linear interpolation, 2-axis arc interpolation 	
AH10PM-5A	6	HDC	2.7w	UC-ET010-15B UB-10-IO24C	<ul style="list-style-type: none"> ▪ Pulse train motion control module ▪ Supports 1MHz output (4 axes) 200kHz output (2 axes) ▪ Supports 2~6-axis linear interpolation, 2-axis arc interpolation and 3-axis helical interpolation ▪ Built in Ethernet communication port ▪ Supports Micro SD card 	
AH15PM-5A	4	HDC	2.7w	UC-ET010-15B UB-10-IO34C	<ul style="list-style-type: none"> ▪ Pulse type motion control module ▪ Supports 1MHz output ▪ Supports 2~4-axis linear interpolation, 2-axis arc interpolation, 3-axis helical interpolation ▪ Built-in Ethernet communication port ▪ Supports Micro SD card ▪ Supports limit switch (LSP / LSN) input 	 
AH20MC-5A	12	HDC	3w	UC-ET010-13B UB-10-IO16C	<ul style="list-style-type: none"> ▪ DMCNET communication motion control module (10Mbps) ▪ Min. synchronization time at 12 axes is 1ms ▪ Supports 2~6-axis linear interpolation, 2-axis arc interpolation and 3-axis helical interpolation ▪ Built in Ethernet communication port ▪ Supports Micro SD card 	
AH08EMC-5A	8				<ul style="list-style-type: none"> ▪ EtherCAT communication motion control (100Mbps) ▪ Min. synchronization time at 8/16/32 axes is 0.5/1/2ms ▪ Supports 2~6-axis linear interpolation, 2-axis arc interpolation and 3-axis helical interpolation ▪ Built in Ethernet communication port ▪ Supports Micro SD card 	
AH10EMC-5A	16	HDC	3.3w	UC-ET010-13B UB-10-IO22C	<ul style="list-style-type: none"> ▪ Supports EtherNet/IP - Adapter mode ▪ Supports I/O connection & explicit message ▪ Connections: TCP=16 ; CIP=32 ▪ RPI: 2~1,000ms ▪ PPS: 3,200 ▪ 250 words/connection ▪ CPU execution speed: LD instruction @ 0.08μs 	
AH20EMC-5A	32				<ul style="list-style-type: none"> ▪ Program capacity: 256k steps ▪ Data register: D=64k words/L=64k words ▪ Supports UD/PD/AB/4AB input modes ▪ Built-in Mini USB programming communication port ▪ Supports G-code ▪ Supports hot-swapping function ▪ Diagnosis function ▪ Module status LED indicator ▪ Supports installation on CPU slot of motion backplane and working as CPU^(Note) ▪ Max. quantity of FB instance is 4096 	

Note: Supports DIQ(except interrupt module), AIO, MC, PM, HC, COPM and SCM modules in the first stage.
