Object: WPLSoft version 2.40 is released.

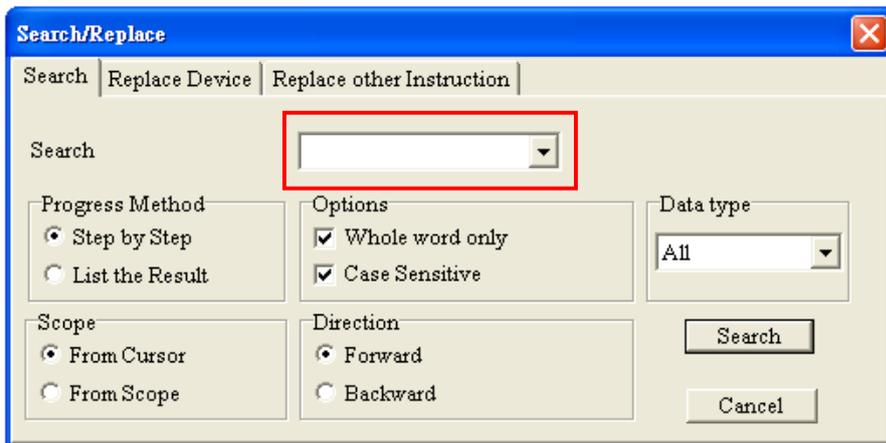

Purpose: The functions which are modified are described, and the function which is added are described.

Description:

1. The problem that users can not edit the MEMW/MEMR instruction for DVP-SX series PLCs is solved.
2. The problem that users can not edit the LDP/LDF instruction for VFD-E/VFD-C2000/VFD-CP2000/VFD-C200 series AC motor drive is solved.
3. The problem that parameters of an applied instruction will be lost after users double-click the applied instruction in a ladder diagram to open its editing box is solved.

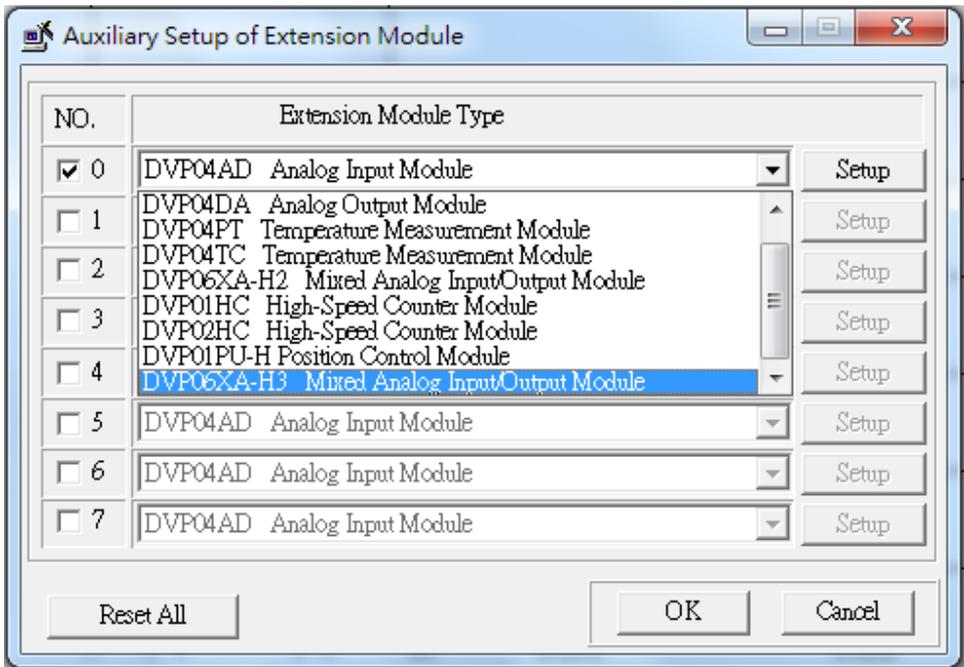

4. The problem that the **Search** box in the **Search/Replace** window will be blank rather than show the text searched for last time if a space or a line is currently selected is solved.

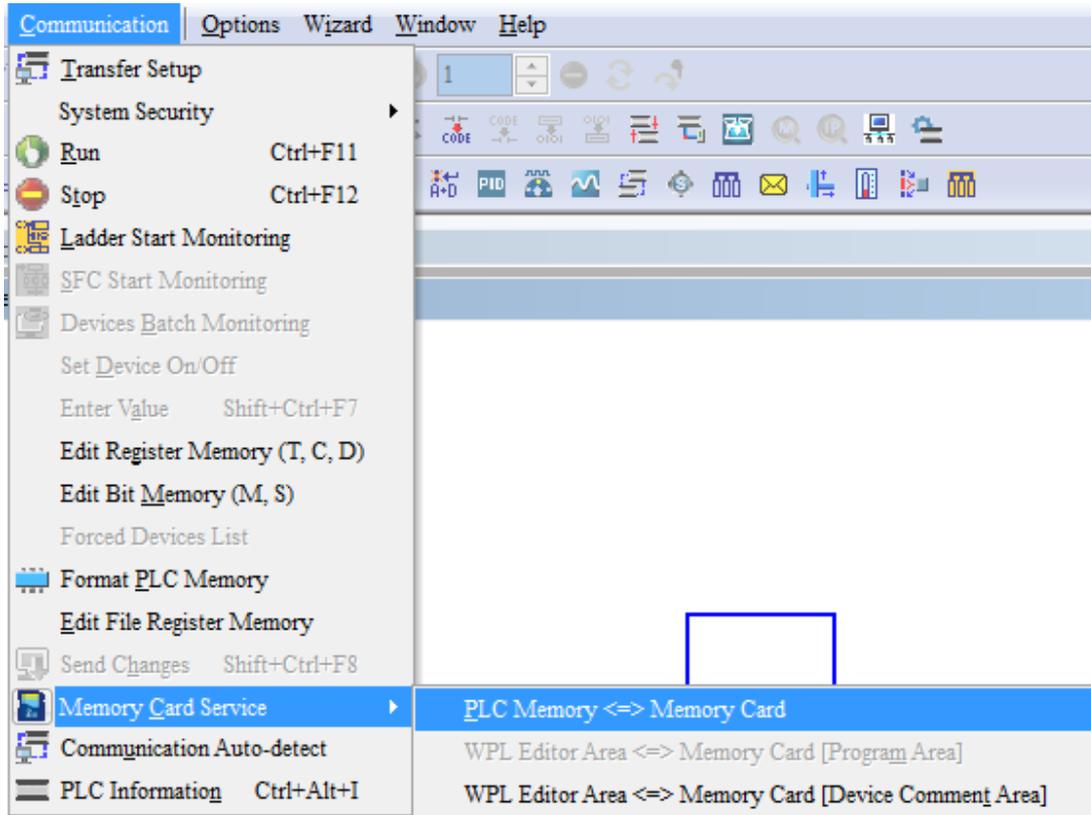

5. The problem that the comments about devices will become the comments about other devices after the they are exported and then imported is solved.

6. **DVP06XA-H3** is added to the **Extension Module Type** drop-down list box in the **Auxiliary Setup of Extension Module** window.

7. The problem that DVP-ES2 series PLCs can not use the **PLC Memory <=> Memory Card** function is solved.
